Reviewer's report

Title: L-Citrulline increases hepatic sensitivity to insulin by reducing the phosphorylation of serine 1101 in insulin receptor substrate-1

Version: 4 Date: 4 May 2015

Reviewer: Elisa Keating

Reviewer's report:

The description of the statistical procedure is still not completely satisfactory. (page 10, line 201): the authors should detail in which cases they used T-test and in which cases they used anova, since it does not make sense to use both tests in the same data.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
