Reviewer's report

Title: Carica papaya induces in vitro thrombopoietic cytokine secretion by mesenchymal stem cells and haematopoietic cells

Version: 3 Date: 12 June 2015

Reviewer: Christian Morsczeck

Reviewer's report:

Authors have to go back to my first recommendation and discuss these point in the article. Moreover, they have to consider that SHED are not typical mesenchymal stem cells, because they are derived from neural crest cells. In the moment the article is unsatisfactorily.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
