Reviewer's report

Title: In vitro effect of bergamot (Citrus bergamia) juice against cagA-positive and-negative clinical isolates of Helicobacter pylori.

Version: 2 Date: 4 April 2015

Reviewer: Alba E Vega

Reviewer's report:

Minor Essential Revisions

The manuscript is a work interesting respect effect in vitro of bergamot (Citrus bergamia) juice against cagA-positive and negative clinical isolates of Helicobacter pylori. The objective posed by the authors is well defined. The methods are appropriate and well described, and are sufficient details provided to replicate the work. The discussion and conclusions are adequately supported by the data. The paper is clearly written.

However I have some observations:

Abstract
Please, use CLA as an abbreviation of clarithromycin
Please, use MTZ in all text. Page 2 line 39 revise MTX

Introduction
Please, use TET as an abbreviation of tetracycline

I recommend its publication in the journal with minor revision. Is an article of outstanding merit and interest in its field.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
