Reviewer’s report

Title: Gastroprotective effect of carob (Ceratonia siliqua L.) against ethanol-induced oxidative stress in rat

Version: 7 Date: 20 May 2015

Reviewer: SUN CHUL Chul Kang

Reviewer’s report:

Although manuscript has been re-reviewed, we found that the manuscript is not suitable for the publication due to following reasons:

1. Manuscript failed to analyze the obtained data properly and the consistency of data is not maintained well. For example, lower concentration is showing good activity compare to those the higher concentrations.
2. The authors did not demonstrate the IC50 value and acute toxicity test also has not been done.
3. Manuscript still contains a lot of grammatical as well as scientific writing mistake e.g. mm which should be mM and so on.

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
