Title: Vanda roxburghii: An experimental evaluation of antinociceptive properties of a traditional epiphytic medicinal orchid in animal models

Version: 2  Date: 12 May 2015

Reviewer: Giuseppina Negri

Reviewer’s report:

Corrections
Page 4 – line 74 – compounds
Line 79 – Vanda Tesselata [19].
Page 5 – Line 91 is 500 gm or 500 mg.
Line 113 – Which tests carried out for each phytochemical class?
Page 7 – Lines 155 – 157 – Rewrite the phrase.
Page 8 – Line 181 – highest activity with 80.23% in which concentration?
Page 10 – Line 209 – The major value in Table 5 is 400 µg/mL.
Line 212 – which is the cutoff value?
Page 19 – Add in legend of Table 1, the test carried out in the phytochemical screening.
Some correlation can be made among phytochemical screening of extract and fractions and antinociceptive properties.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
