Reviewer's report

- Major Compulsory Revisions
In the present study, the authors evaluated the Influence of Cyperus esculentus Tubers (Tiger Nut) on Male Rat Copulatory Behavior. The study was well-designed and well-written. In my opinion this manuscript will provide a significant contribution to male reproductive health.

What is the basis of selecting dose of extract?

- Minor Essential Revisions
Please review and correct some finger's mistakes labeled with yellow Highlight in manuscript.

- Discretionary Revisions
Moderate revisions need to be made. A detailed review of the English language should be performed and after some corrections it can be accepted as regular manuscript.
