Reviewer’s report

Title: Effect of Hydroalcoholic Leaves Extract of Indigofera Spicata Forssk. on Blood Glucose Level of Normal, Glucose Loaded and Diabetic Rodents

Version: 9 Date: 29 July 2015

Reviewer: Priyankar Dey

Reviewer’s report:

According to the previous comments, the authors have somewhat modified the manuscript. However, some other experiments as mentioned in the previous comments are necessary to systematically evaluate the anti-diabetic potentiality of the test material. Additional experiments, at least blood insulin, HbA1c level, MDA content and phytochemical fingerprinting needs to be performed. Mere study of blood glucose load could not be assigned to anti-diabetic activity of any material.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
