Reviewer's report:

The manuscript (BCAM-D-15-00128), entitled 'Effect of the Chinese Traditional Prescription Suo Quan Wan on TRPV1 Expression in the Bladder of Rats with Bladder Outlet Obstruction (sic)', is an interesting report, and when written that will be an interest to BCAM readers.

The major drawback to it however, is that the report is unnecessary too long and can be considerably shortened focusing only on their finding and what it represents deleting all the well-known information. The Introduction alone had 20 references. This is not necessary since the report is not a review.

There are also some salient issues like wrong spelling, sentences and syntax all through the manuscript right from the title that the author spelled obstruction as 'obstrution'. Thus, the article needs editing by a scientific English translator as there are too many corrections.

There is also a lot of mix-up in presentation.
