Reviewer’s report

Title: Complementary and Alternative Medicine Use: Results from a descriptive study of pregnant women in Udi Local Government Area of Enugu State, Nigeria.

Version: 0 Date: 24 Jan 2017

Reviewer: Lifen Chao

Reviewer's report:

The aim of the study is clear. This manuscript is clearly written and rather cohesive. And the data set used in this study is large and representative. The method section was adequately detailed, comprehensive. The authors managed to discuss the outcomes very well and compare the results with other studies conducted.

Some minor revision points following require consideration:

Line 51: The citation represents next to the sentence which is quoted, not be separated by any comma mark. This needs to be fixed throughout the manuscript. E.g. Line 81, 89-95 etc.

In Line 60, the sentence of background "Pregnancy is a vulnerable period especially the first trimester…." seems a strong reality, to convince reader of this perspective I suggest it should be cited from what reference(s) come.

In Line 189, the abbreviation word "TBA" in the table 4, it should be represented in the whole entire spelling as it first displays.

Try to merge several tables into one integrated table, from table 2 to table 7, more briefly command in the discussion section would expected.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
