Title: Caffeoylquinic acid derivatives Rich Extract from Gnaphalium pensylvanicum willd. Ameliorates Hyperuricemia and Acute Gouty Arthritis in Animal Model

Version: 2 Date: 08 May 2017
Reviewer: Patrick Amoateng

Reviewer's report:

The manuscript follows a sound research justification and the experimental model used is valid and the results obtained are adequate to make to the inferences suggested. However, there are a lot of language construction errors and thus the manuscript should be extensively revised before publication is done. The following are some examples of the errors that would need correction:

Line 16-17: Please change 'antitussive' to 'cough.'
Lines 28-31, 33-36: Please revise the sentences
Line 59: What is the meaning of "sur"?

Are the methods appropriate and well described?
