Reviewer’s report

Title: Effect of a herbal extract powder (YY-312) from Imperata cylindrica Beauvois, Citrus unshiu Markovich, and Evodia officinalis Dode on body fat mass in overweight adults: A 12-week, randomized, double-blind, placebo-controlled, parallel-group clinical trial

Version: 0 Date: 15 Apr 2017

Reviewer: Michał Bijak

Reviewer’s report:

This study is not very novel, for example evodiamine is very often used in various types of sport thermogenic products available on commercial market.

The chemical characterization of used extract must be given in this type of study

Study is correct designed, however in my opinion should be also additional study group treated with commercial available thermogenic. That will provide more reliable results.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
