Reviewer’s report

Title: In vitro antioxidant and antimalarial activities of leaves, pods and bark extracts of Acacia nilotica (L.) Del

Version: 2 Date: 29 Apr 2017

Reviewer: Ahmed Abdel Moneim

Reviewer's report:

The authors followed some comments and I still have some comments as following:

- It was noted that polyphenols and flavonoids may be responsible for the protective effect. It would be useful to have the extract analyzed for specific composition (at least major components). In other words, how much polyphenols and flavonoids are found in the extract.

- Statistics should be done in the figure not only in the figure captions.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
