**Reviewer’s report**

**Title:** Sasang constitutional types for the risk prediction of metabolic syndrome: A 14-year longitudinal prospective cohort study

**Version:** 1  **Date:** 07 Jul 2017

**Reviewer:** Jennifer L. Kuk

**Reviewer's report:**

In the end, the Sasang constitutional typing improved the AUC by less than 1%. Even though this is statistically significant, I question the clinical importance and the strength in which the authors have written their conclusions. In my mind, this is very trivial given the work required to do the typing and I think the conclusions need to be tempered.

**Are the methods appropriate and well described?**
