Title: Thai plants with high antioxidant levels, free radical scavenging activity, anti-tyrosinase and anti-collagenase activity

Version: 1 Date: 24 Sep 2017

Reviewer: Nguelefack-Mbuyo Elvine

Reviewer's report:

The authors provide satisfactory answers to the points I raised. But I would like to know how they succeed in calculating IC50 values using just one concentration of plants extracts during their assays. The way the IC50 values were obtained should be explained in the manuscript.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
