Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

The authors have made some revisions according to the 1st round review comments. However, there are still issues not satisfactorily addressed.

1. Although the title in the manuscript has been changed, this has not been altered in the manuscript submitting system. Please check and correct

2. In the revised ABSTRACT, the information in the RESULT part seems too limited. Please add some other key findings in this part.

3. For the protein precipitation, the author still wrote that "aliquots of test samples (100 μl) were mixed with 150 μl of acetonitrile containing metronidazole benzoate". It is not an efficient method for protein precipitation if no more than 3 fold volume of organic solvent is used. Please pay attention and explain the rationale.

4. Why in Fig3 to Fig.5, the x axis and y axis are not visible. Please correct if necessary.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes
Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
