Acute Liver Failure Associated with Fructus Psoraleae: A Case Report and Literature Review

General comments:
This manuscript reported a case of acute liver failure and multiple organ dysfunction, which was thought caused by the intake of Fructus Psoraleae, the chief herb of a Chinese herbal medicine product (Qubaibabuqi Pian). It is important for clinicians to report adverse events or serious adverse events occurred in the clinical practice of Chinese medicine. By reporting and publicizing the adverse events caused by Chinese medicine, a more and more rigorous system of Chinese medicine manufacturing and monitoring will be developed. Authors’ efforts in this aspect should be appreciated.

Specific comments:

1. Have authors reported this serious adverse event to the China Food and Drug Administration (CFDA) through an official reporting system? If yes, please add this information to the manuscript. If it has not been reported to the CFDA, please act on the reporting ASAP and add this information into the manuscript. Please note that reporting a serious adverse event to the CFDA may change the regulation of this medication, which will benefit public in a better way than publishing a manuscript only.

2. The language of the current manuscript is not of an acceptable level for publication. I suggest authors working closely with a strong native editor of medical English to improve the quality of language for further preparing this manuscript for publication.
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript

Quality of written English
Please indicate the quality of language in the manuscript:

Not suitable for publication unless extensively edited

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?
If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests.
