Title: In vitro evaluation of methicillin-resistant and methicillin-sensitive Staphylococcus aureus susceptibility to Saudi honeys

Version: 0 Date: 11 Apr 2019

Reviewer: Antônia Maria Das Lopes Citó

Reviewer's report:

I do recommend the manuscript acceptance since the following requests are considered:

1) The title should include both, S. aureus methicillin-resistant and S. aureus methicillin-sensitive, once both were evaluated. The authors could put in the title S. aureus without any specification, if they would rather that.

2) The geographical coordinates of each honey sample should be indicated;

3) The honey producers bee species should be indicated;

4) The collecting months of each honey sample should be informed;

5) The discussion about the antibacterial activity of other constituents present in honey samples, except for peroxides, could be improved.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
