Version: 2 Date: 21 Jul 2019

Reviewer's report:

Authors have revised manuscript as suggested in few points.

However, it was very difficult to access the changes as it was neither in track change or in different fonts/backgrounds.

I recommend authors to revise in a way that revisions will be easily visible.

There are still many problems with presentation and spelling and grammatical errors.

I included few suggestions in attached PDF file.

Please revise manuscript extensively as the language quality is very poor.
