Reviewer's report:

It is interesting work; over all description is also good. However, careful review by the authors is required, as even, for example, the plant name is not correctly written at least one time. Discussion section needs more elaboration about the significance of the work done. In it, your results need to be viewed in the perspective of the similar work done before while also comparing them with one another. Only self citation is given, while discussion, in general needs, citation from the work of other people to compare and contrast your findings. Every claim needs to be supported by the work of other experts.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
