Reviewer’s report

Title: Schisandra chinensis bee pollen’s chemical profiles and protective effect against H2O2-induced apoptosis in H9c2 cardiomyocytes

Version: 0 Date: 26 Feb 2020

Reviewer: shaza mohamed almassarani

Reviewer's report:

The article is an original article, well written, with scientific rigor, it contains good methodology and results which assures the confidence in the results reached in this research. The identification approach for the main components by UPLC-QTOF MS/ MS and the proposed MS/MS fragmentation pathway is clear, scientifically accurate and well presented. The provided supplementary material greatly enhanced the reliability of the work. Overall, the scope of the study and the findings presented in the current manuscript format are sufficient to be considered for publication in BMC Complementary and Alternative Medicine.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
