Reviewer’s report

Title: A randomized, double-blind, positive-controlled, prospective, dose-response clinical study to evaluate the efficacy and tolerability of an aqueous extract of Terminalia bellerica in lowering uric acid and creatinine levels in chronic kidney disease subjects with hyperuricemia.

Version: 1 Date: 18 Mar 2020

Reviewer: Sajjad Ahmad

Reviewer's report:

1. Provide the protocol for the acquisition aqueous extract of Terminalia bellerica
2. How the percentage of each component e.g., chebulinic acid, chebulagic acid etc was measured?
3. The detailed HPLC analysis should be incorporated into the manuscript.
4. Provide the detailed dosage, with the solvent/excepients.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
