Title: De novo acute lymphoblastic leukemia-like disease of high grade B-cell lymphoma with MYC and BCL2 and/or BCL6 rearrangements: a case report and literature review

Version: 0 Date: 23 May 2017

Reviewer: SHWETA CHAUDHARY

Reviewer's report:

The manuscript is well written with no major concerns. Two minor things which can be worked up on are:

1. In the background section, in second paragraph there is a typing error (HBGL should be HGBL)

2. As the MIB-1 index is unexpectedly low, the author should mention in detail which method is used to calculate it as there can be interobserver variability with the different methods

3. Can author explain why this is not primary solid organ lymphoma (liver/ spleen with accumulation of FDG on PET scan) which progressed to involve bone marrow.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
