Reviewer's comments

The authors have a very good case study but have not been able to write about it satisfactorily. My other suggestions to improve on the quality of the manuscript are as follows:

Major compulsory revision

Title:

* The title is should read "urinary schistosomiasis" not "bilhraziasis".

Abstract:

* line 4: the word 'except' should be rechecked. The abstract should be rewritten more clearly.

Case Presentation:

* It should be rewritten with simpler and clearer English.
Discussion:

* The authors simply wrote the biology of Schistosoma haematobium. They wrote on the lifecycle, endemicity, complications and diagnosis of S. haematobium. They did not relate all these headings to the case in question. So let the discussion relate to the case study.

**Are the methods appropriate and well described?**
If not, please specify what is required in your comments to the authors.

Yes

**Does the work include the necessary controls?**
If not, please specify which controls are required in your comments to the authors.
