Reviewer’s report

Title: BCL-2 expression aids in the immunohistochemical prediction of the Oncotype DX breast cancer recurrence score

Version: 0 Date: 27 Jun 2018

Reviewer: Bradley Turner

Reviewer’s report:

This study adds value to the role of immunohistochemistry in the risk stratification of breast cancer patients.

The results section is cumbersome to read and make the statistics more confusing. Much of the results section could be discussed in the methods and even the discussion.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
