Reviewer’s report

Title: Evaluation of oral microbiology lab curriculum reform

Version: 5 Date: 7 May 2015

Reviewer: Michelle Visser

Reviewer’s report:

The manuscript has been improved from the previous version. There are still a few minor grammar and text errors.

Line 223-226: “Is the problem uneven oscillation specimens?” “Is the problem overcrowding inoculation?” And so on. Comprehension as the combination from different fields is the advantage of this curriculum.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
