Reviewer's report

Title: Medication Safety Curriculum: Enhancing Skills and Changing Behaviors

Version: 2  Date: 26 March 2015

Reviewer: Kwang Chien Chien Yee

Reviewer's report:

Major revisions:
1. The discussion section needs to be completely re-written. This section as it stands, sounds like a qualitative research results presentation rather than discussion your statistical results and how that relates to the literature.

2. Discussion section, what does it mean? Why do you think that it works!

3. Figure 2, if your scale is 0 to 6, why is your vertical bar has 0 to 7 label?

Minor essential revisions
4. How about the bias that students who choose to do this unit is already interested in medication safety?

Discretionary revisions
5. Is medication reconciliation a role for junior physicians? IN some areas of the world, this job is done by ward pharmacist.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I declare that I had no competing interests
