Title: Is perfect good? - Dimensions of perfectionism in newly admitted medical students

Version: 0 Date: 06 Aug 2017

Reviewer: Maria Cristina Pereira Lima

Reviewer’s report:

The study was well designed and the method is appropriate. The main limitations are the impossibility of generalization, acknowledged by the authors, and the small number.

My only comment: It would be interesting to provide some information about the group that did not respond for example by comparing them with the respondents. Although the percentage is small (16.8%) if it mainly belongs to one of the groups, it can lead to response bias.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
