Reviewer’s report

Title: Implementation of a novel population panel management curriculum among interprofessional health care trainees

Version: 0 Date: 14 Aug 2017

Reviewer: Margaret Stuber

Reviewer’s report:

This is a straightforward intervention to teach population panel management in an interprofessional clinical setting. To have a large enough sample size this study looks at data over 4 years. As is often the case for such studies, there are a larger number of internal medicine trainees than APN of pharmacy.

The methods are described enough to allow for replication. The results are to some extent just learner satisfaction. However, given the nature of the topic, it is great to have this level of satisfaction and value from the learners. I know we at other IPE settings will be interested.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
