Title: Content validation of an interprofessional learning video peer assessment tool

Version: 1 Date: 06 Oct 2017

Reviewer's report:

Thank you for the opportunity to review your revised manuscript. Having valid tools to assess IPL is critical and you have outlined a theory-based, iterative process that others could follow similarly. The only comments I have are related to the results on the domains:

Domain 2, top of page 14--I was looking for a clearer statement about an example demonstrating how the group was "not" sharing decision-making. It seems this is a general statement more than an illustration substantiating the domain.

Domain 3, this domain seems to have some very general quotes I find hard to attach "meat" to the explanation of the domain. Are there more explicit quotes that can illuminate the domain better?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
