Reviewer's report:

Dear Authors

you have revised the manuscript in line with the expectations.

the manuscript is consistent and logical; the background is well provided as well as the method section. The findings are consistent with the research questions and the discussion is well developed. I only suggest to revise the conclusions: there is a need to improve some details regarding the implications, while the first and the second statements are not in line with the limitations of the study (there is no causality between the variables in a cross sectional study).

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
