Reviewer’s report

Title: Implementing an initiative to promote evidence-informed practice: part 1 — a description of the Evidence Rounds program

Version: 0 Date: 09 Sep 2018

Reviewer: Andree Le May

Reviewer's report:

I have enjoyed reading this paper. It is a full and useful account of the process and some outcomes associated with the introduction of Evidence Rounds but the reader does not know much about what happens in Part 2 of the paper. I wonder if there's scope for inserting some sort of summarising box of the findings presented in Part 2 for readers who do not then go on to read it. Or indeed if it is not published. Doing so would ensure that readers knew the findings from the focus groups and interviews. There are a few other minor changes that would enhance the work (see annotated attachment).

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
