I previously reviewed this paper and made some recommendations, all of which have been satisfactorily met. I have only one further suggestion. Within the limitations section I would suggest that the authors state that the questions were formulated in Japanese and translated. I believe that they are entirely appropriate within the Japanese cultural context but some of the items may not be entirely appropriate in other cultures. This should not interfere with the publication of the paper.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
