This seems to be a reasonable paper. Its import is not overwhelming. Nevertheless, that a medical school in another country with a significantly younger student population generally replicated the success of such a program in the US seems worthy of publication. As with so much medical education research, it is pretty tough to tell whether any program makes a lot of difference given that you start with a highly-intelligent and highly motivated group of subjects. This is no exception but it at least shows that this kind of program doesn't fail in a somewhat different climate.

Page 16, second paragraph - Consider rephrasing the first sentence to make its meaning clearer.

Page 17, first sentence - meaning unclear.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
