Title: Video feedback and e-Learning enhances laboratory skills and engagement in medical laboratory science students

Version: 1 Date: 05 Jul 2019

Reviewer: Claudia Krebs

Reviewer's report:

The manuscript has been revised to address the reviewers comments. The methodologies limitations are clearly stated.

My one comment would be that there should be more of a discussion around the total number of hours spent in the educational experience. The intervention group appears to have had a much richer experience with more exposure to the content. This should be clearly stated - and it's an advantage of the proposed curricular intervention.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
