Title: Acceptance of the 'Assessment of Physiotherapy Practice (Chinese)' as a standardized evaluation of professional competency in Chinese physiotherapy students: an observational study

Version: 1 Date: 23 Mar 2020

Reviewer: Benjie Tang

Reviewer's report:

I had second review of this manuscript. The authors have responded my comments appropriately.

There are still number of issues that the authors need to address.

1. The conclusion in the main text is too long and inappropriate. Conclusion(s) can only be drawn from the finding(s)s of the data.

2. Neither the work process nor what you believe can be included in the conclusion section. Thus, sentences from line 45 on page 14 to line 1 on page 15 should be removed.

3. Ling 53 page13, "As regards" could be replaced with "regarding" as a minor correction.

4. Minor issue such as "Conclusion" line 25 on page14 should be "Conclusions".

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
