Title: Taking care of our Future Doctors A Service Evaluation of a Medical Student Mental Health Service

Version: 0 Date: 09 Feb 2020

Reviewer: Yera Hur

Reviewer's report:

Medical student's wellness is a very important issue.
I understand that the number of participants could be quite low - Since this study collected data for 5 years but the number of N could not go over 100.

I strongly suggest for the authors to review the paper (reading out low would be the best) thoroughly, so that there are no simple grammar mistakes and wordings.

For the results, since you have showed many tables and figures, it would be better if the writings were focused to the most important outcomes, instead of elaborating too much numbers as indentical to the tables and figures.

And for the conclusion, please add some data of the previous studies on the subject and compare with the results you have gained.

Are the methods appropriate and well described?
