Title: Questionnaires on stigmatizing attitudes among healthcare students in Taiwan: Development and validation

Version: 0 Date: 01 Jul 2019

Reviewer: Yesim Senol

Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding Questionnaires on stigmatizing attitudes among healthcare students in Taiwan: Development and validation

The manuscript provides an overview of the development of a questionnaire to evaluate the Stigmatizing attitudes among healthcare students. It is stated that EBP is divided into 3 components (Mental Illness, Children with EBP, Disabilities)

Minor Essential Revisions

The issue is important for healthcare professionals. But there are some problems in the method section. More information should be provided regarding validation. It is recommended to determine the sample according to the number of items. Exploratory Factor Analysis and Confirmatory factor analysis wasn't performed. Exploratory Factor Analysis and Confirmatory factor analysis wasn't performed. Therefore an additional statistical support can be take.

"Discussion", more comprehensive comparison should be made between the result of current study and the previous investigation done in Taiwanese population.

The English writing of the manuscript is fine.

your comments to the authors.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No
