Reviewer’s report

Title: "Decision-making capacity for research participation among addicted people: a crosssectional study"

Version: 2 Date: 18 Nov 2015

Reviewer: Irma Hein

Reviewer’s report:

The authors improved the paper very much again.
To my opinion there are only two unresolved issues left:

1. Some spelling errors
   - P4 line 16: populations
   - P15 line 20: confirm

   Figure 1 contains many language mistakes.

2. Results p 13: the authors did not explain clearly, why they chose to enter only some of the factors that were significantly associated with incapacity in the logistic regression model and others, like educational level, CGI, GAF, MMSE, not. Shouldn't all significantly related factors be entered stepwise? How do the authors think this would influence the outcomes?

Are the methods appropriate and well described?
