Reviewer’s report

Title: Does growing up with a physician influence the ethics of medical students' relationships with the pharmaceutical industry? The cases of the US and Poland.

Version: 2 Date: 19 Dec 2016

Reviewer: Alastair V. Campbell

Reviewer's report:

I suggest you clarify the Tables in the article, as they are somewhat confusing. What do the percentages in the shaded boxes refer to? They are headed 'total', but this is unclear. How do they related to the percentages in the other columns? I suggest you clarify by giving a fuller heading to the shaded column. Do you think your findings are relevant more widely than simply to the USA and Poland? I suggest you add a sentence or two about how your research might be extended to other countries, and also speculate about what other ethical aspects among medical students might be researched using comparisons between those whose relatives are or are not doctors.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
