Reviewer’s report

Title: Gender and age disparity in the initiation of life-supporting treatments: a population-based cohort study

Version: 0 Date: 10 May 2017

Reviewer: Manasse Bambonye

Reviewer's report:

This study accurately estimates the annual gender and age disparities of ECMÒ. It also correctly highlights the importance of family members decisions in influencing medical decisions in the use of LSTs in association with cultural values in Taiwan. This highlight gives an additional value to this paper.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
