This is a well designed study on an important topic pertaining to clinical trials in developing countries. My only comment is that I am unclear as to how you got exactly 604 cases and 604 controls. This would seem highly unlikely, since some might refuse to participate, which would affect the number. Please clarify.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
