Title: Truth Telling and Doctor Assisted Death as perceived by Israeli Physicians

Version: 1  Date: 13 Jan 2019

Reviewer: Pam Oliver

Reviewer's report:

I still find that there are many unsubstantiated claims in the article, and some of the authors' conclusions cannot be justified based on the research results (e.g. the conclusion that GPs' lower support for truth-telling is based on their closer relationship with patients, with no evidence of the latter factor). The punctuation throughout needs to be checked. However I believe the article should be published because it adds to the international literature by providing information from Israel.
