Title: The involvement of family in the Dutch practice of euthanasia and physician assisted suicide: a systematic mixed studies review

Version: 0 Date: 08 Jan 2019

Reviewer: Brian Leslie Mishara

Reviewer's report:

This is an excellent review of studies of the family and the practice of physician assisted dying in the Netherlands. It is well written, comprehensive, and contributes significantly to our understanding of the important current role of the family in the decision making process, as contrasted with existing Dutch laws and regulations which view the decision making process as autonomous by the patient, and do not mention the family other than excluding instances where there may be undue influence. The recommendations for further research are much appreciated.
