Reviewer's report

Title: nursing and midwifery students' attitudes towards principles of medical ethics in Kermanshah, Iran

Version: 0 Date: 23 Mar 2018

Reviewer: Sevil Guler Demir

Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

General

There are many spelling errors in the article. For example some sentences are started with small letter. (E.g. page 4, Line 11…)

Please, revise your paper according to the BMC Medical Ethics Author Guidelines (double space, …) (You can see https://bmcmedethics.biomedcentral.com/submission-guidelines/preparing-your-manuscript )

Abstract

The Word "conclusion" should be start with capital letter. Please, edit the sentences at this section for better understanding by readers.

Background:

Page 5 Line 11: " According to some studies, many physicians and nurses …. ethical information (12). "You are stated some studies, but use only one reference. Please, check it.

Page 5 Line 28-31: "Units" Please clarify it. Did you mean local credit or section in the lesson?
Page 6 Line 33-37: Please, edit the sentence.
Methods:

The semesters' years, in which the study was performed, are different at sections Research design (2013-2014) and Study sample (2014-2015). Please, check and revise it. Page 6 Line 41-45: "In this study, the content validity of the questionnaire was reviewed by 10 experts in order to correct the final verifications of the items. The reliability of the questionnaire was also re-evaluated using Cronbach's alpha, and the alpha coefficient of 0.82 was obtained." Please, insert the reference at the end of the sentence.

Page 6 Line 47: Please, correct the word "minim" as "minimal".

Procedure: Please, edit the first sentence of this section.

Results:

This section is generally well written, but unfortunately seems to be the shortest main section of the article.

Table 1 and Table 2: Please, edit the first letters of some variables. Some of them are capital or small. The table 1's head should be "Comparing the mean scores of attitudes toward principles of medical ethics based on demographic characteristics". Please, insert the name of the statistical analyse used in the table at the end.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
