Reviewer’s report

Title: Ethical issues and practical barriers in internet-based suicide prevention research: A review and investigator survey.

Version: 1 Date: 01 Apr 2020

Reviewer: Douglas Wassenaar

Reviewer's report:

The authors have addressed both reviewers' comments thoroughly and thoughtfully.

A few tiny edits are required:

P. 4 line 16; I think 'give' should be 'gives'
p. 16 line 2; p. 17 line 24; the Declaration line 10 should all include the word 'research' before 'ethics committee' in the newly added text, as was done to the revised manuscript.

Because the authors decided to leave the Discussion sequence unchanged (with part 2 presented first), which is acceptable, a simple explanation of this sequence should be added for the reader who might expect the Discussion to start with findings from part 1 of the study.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
