Reviewer's report

**Title:** Stratification of Coronary Artery Disease Patients for Revascularization Procedure Based on Estimating Adverse Effects

**Version:** 4  **Date:** 5 December 2014

**Reviewer:** Steven Babin

**Reviewer's report:**

I greatly appreciate the authors efforts at addressing my comments. I believe that the manuscript is now ready for publication.

There probably is not enough information but it might add interest to the paper if some appropriate reference could be made to the recent stent operation on US Supreme Court Justice Ginsberg. This is just a thought and is by no means meant to be required.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests.
