Reviewer’s report

Title: Utilizing patient data from the Veterans Administration electronic health record to support Web-based clinical decision support: Informatics challenges and issues from three clinical domains

Version: 0 Date: 23 Oct 2016

Reviewer: Manoj Mammen

Reviewer's report:

It is a very well written summary of the United States Veterans Administration (VA) Electronic Health Record (EHR) environment and the challenges that arose when linking clinical decision support tools to the EHR. The description of the VA infrastructure and the issues that arose in linking CDS tools the EHR would assist in others to build systems in the future.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript

Quality of written English
Please indicate the quality of language in the manuscript:
