Reviewer's report:

Thanks for giving me the opportunity to review this article. This is a well-designed study with promising results for home and community care. I only have the following minor suggestions.

- I would like to suggest the authors to rename Table 1a and 1b to Table 1 and 2, and Table 2a and 2b to Table 3 and 4, respectively.

- The authors may also discuss possible implementation (including potential challenges) of the assessment tool in the whole country. Further, are there any plans to apply the system in other countries with similar healthcare settings?
