Reviewer’s report

Title: Advancing beyond the system: telemedicine nurses' clinical reasoning using a computerized decision support system for patients with COPD - an ethnographic study

Version: 0 Date: 26 Oct 2017

Reviewer: Ana Sabo

Reviewer's report:

The paper presents the analysis of a nurse's work in the TM setting. The work is based on the description of the work of only three sisters. The conclusions are also based on this very small sample. Discussion is too long, consists mainly from the citations. The reasons for not using always the CDSS recommendations are not discussed (Despite the fact that nurses have often advanced beyond the system recommendations). I suggest to shorten discussion, and to discuss the above mentioned reasons. Without it, the work is mainly the description of the view of the sister.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
