Title: Functionality of Hospital Information Systems: Results from a Survey of Quality Directors at Turkish Hospitals

Version: 1 Date: 17 Aug 2017

Reviewer: Suman Kundu

Reviewer's report:

If the authors could identify the place where they updated/clarified in text either using track change or a different color, it would be convenient to see this without reviewing the whole manuscript.

I still have couple of doubts:

1. If 'availability' is a binary variable, what do they mean by: "We calculated the mean availability."
2. If one variable is binary and other is continuous how to justify using a Pearson correlation which requires both variables to be continuous.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
